

# SmartBlade

Small, fine and precise – the compact plasma cutting machine

SmartBlade

# Your entry into top quality plasma cutting

Our compact plasma cutting machine SmartBlade is the inexpensive entry-level machine for all those who demand the best possible quality even for more complex vertical cuts.

Small, fine and precise, it is designed for use in small workshops with little floor space while offering all the advantages of a fully-fledged plasma cutting machine.

When developing the machine concept, we focused on the operator.

This is why the SmartBlade is extremely easy to handle, ensuring flexible working while obtaining the desired cutting quality for all tasks.

## BENEFITS

- + Best price-performance ratio
- + High cutting quality for mild steel, stainless steel and aluminium
- + Simple operation with the CNC Global Control
- + Integrated cutting table
- + Maximum working width with minimum space
- + High precision thanks to double-sided longitudinal drives
- + Minimised torch damage due to collision detection and magnetic torch holder

Complex plasma vertical cuts are possible up to 15 mm sheet thickness

Compact cutting system with simple operation
