

TerraBlade^D

Flexible and compact:
The oxyfuel- and plasma cutting machine

TerraBlade^D

Your entry into top quality oxyfuel and plasma cutting

If customer orders need to be processed particularly quickly, they are easily produced with the TerraBlade^D. Combining all advantages of oxyfuel and plasma cutting machines in a compact format, it is designed for use in small workshops as well as in large industrial halls.

With the operator's needs in view we developed a machine which is simple to handle and quickly leads to the desired results. As an inexpensive entry-level machine, the TerraBlade^D is made for everyone who is looking for simple application without sacrificing quality.

BENEFITS

- + Best price-performance ratio
- + High cutting quality for mild steel, stainless steel and aluminium
- + Simple operation with the CNC Global Control
- + Maximum working width with minimum space
- + High precision thanks to double-sided longitudinal drives

Quality cuts with plasma

Excellent and cost-effective oxyfuel cuts
